

Colt 800 PB

CODE: NSSCPB

Cordless Wet & Dry Vacuum

For enhanced safety, productivity, and versatility, the battery powered
Colt 800 PB is unrivalled.

- Powerful and long-running, the Colt PB is ideal for wet entryways, food and liquid spills in occupied areas, and any location where an electrical outlet is unavailable.
- This Colt's cordless design eliminates the risk of trip/fall accidents, messy cords laying across wet floors, and costly cord repairs.
- Roto moulded polyethylene construction – durable and long life.
- Its power head incorporates narrow openings and large chambers to reduce motor noise, just like a car muffler. Only 65 dbA (62 dbA with front mount squeegee), it can be used day or night in occupied areas.
- The ergonomic dual-twin handles ensure operators of all sizes always have a comfortable hand position. The front handgrips assist manoeuvrability when using the tip-dispose feature, especially in tight toilet stalls.
- 550W, 3-stage, 24V vacuum motor provides plenty of cleaning muscle for dry and wet pick-up, including stripping solution recovery.
- The motor is cooled by a separate stream of air to prevent damage from moisture and debris.
- With two 12V 115 amp/hour batteries, the Colt 800 PB provides over three hours of runtime, and the standard on-board battery charger enables recharging anywhere.
- For added versatility an 80cm front-mount squeegee is optional.
- Optional HEPA filter for healthcare use.

Vac Motor	24V 550W Triple Fan
Air Flow	32 L/sec
Batteries	2x 12V
Run Time	3 - 3.5 Hours
Noise Level	65 dB
Capacity	30L Wet 66L Dry
Filtration	Dynel filter bag 0.4 m ²
Weight	100 Kg inc batteries

No Cables!
